Author index for papers in Volume 51

Pages are numbered consecutively through the volume: 1–244, January/March; 245–498, May/June; 499–634, September; 635–799, November.

Agnello, P. D.
5 see Poindexter, D. J.

Aharoni, M.
217 see Duale, A. Y.

Ahuja, R. K.
325 see Vaidyanathan, B.

Albus, A.
207 see Theurich, K.

Altshuler, Y.
263 see Naveh, Y.

Alves, L. C.
145 see Mueller, M. J.

Amann, S.
103 see Srikrishnan, J.

Anderson, G. F., D. A. Selby, and M. Ramsey
465 *Insider attack and real-time data mining of user behavior*

Armstrong, W. J., R. L. Arndt, T. R. Marchini, N. Nayar, and W. M. Sauer
757 *IBM POWER6 partition mobility: Moving virtual servers seamlessly between physical systems*

Arndt, R. L.
757 see Armstrong, W. J.

Arnold, T. W., A. Dames, M. D. Hocker, M. D. Marik, N. A. Pellicciotti, and K. Werner
87 *Cryptographic system enhancements for the IBM System z9*

Asano, S.
529 see Flachs, B.

Asghar, M.
433 see Katircioglu, K.

Averill, R. M. III
685 see Berridge, R.

Axnix, C., T. Hendel, M. Mueller, A. Nuñez Mencias, H. Penner, and S. Usenbinz
195 *Open-standard development environment for IBM System z9 host firmware*

Badia, R. M.
593 see Perez, J. M.

Banzhaf, G.
103 see Srikrishnan, J.

Barahona, F., P. Chowdhary, M. Ettl, P. Huang, T. Kimbrel, L. Ladanyi, Y. M. Lee, B. Schieber, K. Sourirajan, M. I. Sviridenko, and G. M. Swirszcz
391 *Inventory allocation and transportation scheduling for logistics of network-centric military operations*

Barish, A. E.
685 see Berridge, R.

Becht, M.
173 see Helmich, U.

Becht, M. J.
173 see Helmich, U.

Bellens, P.
593 see Perez, J. M.

Berger, D. M., J. Y. Chen, F. D. Ferraiolo, J. A. Magee, and G. A. Van Huben
53 *High-speed source-synchronous interface for the IBM System z9 processor*

Berridge, R., R. M. Averill III, A. E. Barish, M. A. Bowen, P. J. Camporese, J. DiLullo, P. E. Dudley, J. Keinert, D. W. Lewis, R. D. Morel, T. Rosser, N. S. Schwartz, P. Shephard, H. H. Smith, D. Thomas, P. J. Restle, J. R. Ripley, S. L. Runyon, and P. M. Williams
685 *IBM POWER6 microprocessor physical design and design methodology*

Berrospi, C.
421 see Labbi, A.

Berry, C. J.
19 see Mayer, G.

Better, M., F. Glover, and M. Laguna
477 *Advances in analytics: Integrating dynamic data mining with simulation optimization*

Black, C. T., R. Ruiz, G. Breyta, J. Y. Cheng, M. E. Colburn, K. W. Guarini, H.-C. Kim, and Y. Zhang
605 *Polymer self assembly in semiconductor microelectronics*

Boedi, R.
447 see Korevaar, P.

Bohizic, T. J.
217 see Duale, A. Y.

Bolan, T. V.
185 see Muehlbach, A.

Bomar, M. S.
185 see Muehlbach, A.

Bowen, M. A.
685 see Berridge, R.

Breyta, G.
605 see Black, C. T.

Brice, F. W.
103 see Srikrishnan, J.

Brokenshire, D. A.
529 see Flachs, B.

Brokenshire, D. A.
503 see Johns, C. R.

Bronner, G. B.
5 see Poindexter, D. J.

Brown, T. M.
433 see Katircioglu, K.

Broyles, M. A.
775 see McCreary, H.-Y.

Butt, S. A.
5 see Poindexter, D. J.

Camporese, P. J.
685 see Berridge, R.

Carey, S. M.
19 see Mayer, G.

Carlough, S. R.
663 see Eisen, L.

Carney, C. M.
19 see Mayer, G.

Castaño, J.
77 see Wyman, L. W.

Cautillo, G.
145 see Mueller, M. J.

Chan, P. T.
119 see Zee, M.

Chan, Y.-H.
715 see Curran, B.

Chan, Y. H.
747 see Plass, D. W.

Chen, J. Y.
53 see Berger, D. M.

Chen, T., R. Raghavan, J. N. Dale, and E. Iwata
559 *Cell Broadband Engine Architecture and its first implementation—A performance view*

Cheng, J. Y.
605 see Black, C. T.

Chowdhary, P.
391 see Barahona, F.

Christian, K. L.
37 see Harrer, H.

Clarke, W. J.
145 see Mueller, M. J.

Colburn, M. E.
605 see Black, C. T.

Conklin, C. R., C. J. Hollenback, C. Mayer, and A. Winter
157 *Reducing planned outages for book hardware maintenance with concurrent book replacement*

Connors, D. P.
251 see Gresh, D. L.

Connors, D. P.
263 see Naveh, Y.

Crafts, J. M.
65 see Rizzolo, R. F.

Curran, B., E. Fluhr, J. Paredes, L. Sigal, J. Friedrich, Y.-H. Chan, and C. Hwang
715 *Power-constrained high-frequency circuits for the IBM POWER6 microprocessor*

Dale, J. N.
559 see Chen, T.

Dames, A.
87 see Arnold, T. W.

D'Amora, B. D.
573 see Nanda, A. K.

Dash, S., J. Kalagnanam, C. Reddy, and S. H. Song
345 *Production design for plate products in the steel industry*

Day, M. N.
573 see Nanda, A. K.

Decker, M. H.
217 see Duale, A. Y.

Dhong, S. H.
529 see Flachs, B.

DiLullo, J.
685 see Berridge, R.

Doettling, G.
19 see Mayer, G.

Dreps, D. M.
37 see Harrer, H.

Duale, A. Y., M. H. Decker, H.-G. Zipperer, M. Aharoni, and T. J. Bohizic
217 *Decimal floating-point in z9: An implementation and testing perspective*

Dudley, P. E.
685 see Berridge, R.

Dugan, R.
103 see Srikrishnan, J.

Easton, J. R.
173 see Helmich, U.

Edelstein, D. C.
5 see Poindexter, D. J.

Eickhoff, F.
207 see Theurich, K.

Eisen, L., J. W. Ward III, H.-W. Tast, N. Mäding, J. Leenstra, S. M. Mueller, C. Jacobi, J. Preiss, E. M. Schwarz, and S. R. Carlough
663 *IBM POWER6 accelerators: VMX and DFU*

Emmes, D. B.
229 see Webb, A. M.

Engler, E.
145 see Mueller, M. J.

Errickson, R. K.
173 see Helmich, U.

Ettl, M.
391 see Barahona, F.

Fasano, J. P.
251 see Gresh, D. L.

Faure, T. B.
5 see Poindexter, D. J.

Ferraiolo, F. D.
53 see Berger, D. M.

Fields, J. S.
639 see Le, H. Q.

Flachs, B., S. Asano, S. H. Dhong, H. P. Hofstee, G. Gervais, R. Kim, T. Le, P. Liu, J. Leenstra, J. S. Liberty, B. Michael, H.-J. Oh, S. M. Mueller, O. Takahashi, K. Hirairi, A. Kawasumi, H. Murakami, H. Noro, S. Onishi, J. Pille, J. Silberman, S. Yong, A. Hatakeyama, Y. Watanabe, N. Yano, D. A. Brokenshire, M. Peyravian, V. To, and E. Iwata
529 *Microarchitecture and implementation of the synergistic processor in 65-nm and 90-nm SOI*

Floyd, M. S., S. Ghiasi, T. W. Keller, K. Rajamani, F. L. Rawson, J. C. Rubio, and M. S. Ware
733 *System power management support in the IBM POWER6 microprocessor*

Floyd, M. S.
775 see McCreary, H.-Y.

Fluhr, E.
715 see Curran, B.

Foote, T. G.
65 see Rizzolo, R. F.

Fowler, J. A.
119 see Zee, M.

Frazier, G. R.
103 see Srikrishnan, J.

Friedrich, J.
715 see Curran, B.

Gehrmann, T.
173 see Helmich, U.

Geissler, A. J.
775 see McCreary, H.-Y.

Gervais, G.
529 see Flachs, B.

Ghiasi, S.
733 see Floyd, M. S.

Glassen, S. G.
173 see Helmich, U.

Glover, F.
477 see Better, M.

Goldman, J.
119 see Zee, M.

Goldrian, G.
573 see Nanda, A. K.

Goth, G. F.
37 see Harrer, H.

Greenspan, S. J.
229 see Webb, A. M.

Greenspan, S. R.
173 see Helmich, U.

Gresh, D. L., D. P. Connors, J. P. Fasano, and R. J. Wittrock
251 *Applying supply chain optimization techniques to workforce planning problems*

Gresh, D. L.
263 see Naveh, Y.

Grosch, D. A.
5 see Poindexter, D. J.

Grosch, D. A.
65 see Rizzolo, R. F.

Guarini, K. W.
605 see Black, C. T.

Hanson, R. E.
573 see Nanda, A. K.

Harrer, H., D. M. Dreps, T.-M. Winkel, W. Scholz, B. G. Truong, A. Huber, T. Zhou, K. L. Christian, and G. F. Goth
37 *High-speed interconnect and packaging design of the IBM System z9 processor cage*

Hartman, S. P.
775 see McCreary, H.-Y.

Hatakeyama, A.
529 see Flachs, B.

Helmich, U., M. Becht, M. J. Becht, J. R. Easton, R. K. Errickson, T. Gehrmann, S. G. Glassen, S. R. Greenspan, F. Koeble, H. Lehmann, C. Mayer, J. S. Nikfarjam, F. A. Schumacher, and W. Storz
173 *Redundant I/O interconnect*

Helmich, U.
131 see Oakes, K. J.

Hendel, T.
195 see Axnix, C.

Hirairi, K.
529 see Flachs, B.

Hocker, M. D.
87 see Arnold, T. W.

Hofstee, H. P.
529 see Flachs, B.

Hofstee, H. P.
521 see Shimizu, K.

Hollenback, C. J.
157 see Conklin, C. R.

Hu, J., B. K. Ray, and M. Singh
281 *Statistical methods for automated generation of service engagement staffing plans*

Huang, P.
391 see Barahona, F.

Huber, A.
37 see Harrer, H.

Hwang, C.
715 see Curran, B.

Immel, D.
185 see Muehlbach, A.

Immel, D.
207 see Theurich, K.

Ivers, T.
5 see Poindexter, D. J.

Iwata, E.
559 see Chen, T.

Iwata, E.
529 see Flachs, B.

Jacobi, C.
663 see Eisen, L.

Jha, K. C.
325 see Vaidyanathan, B.

Johns, C. R., and D. A. Brokenshire
503 *Introduction to the Cell Broadband Engine Architecture*

Jones, H.
583 see Liu, Y.

Kalagnanam, J.
345 see Dash, S.

Katircioglu, K., T. M. Brown, and M. Asghar
433 *An SQL-based cost-effective inventory optimization solution*

Kawasumi, A.
529 see Flachs, B.

Keinert, J.
685 see Berridge, R.

Keinert, J.
19 see Mayer, G.

Keller, D.
375 see Parija, G.

Keller, T. W.
733 see Floyd, M. S.

Kesavarapu, S.
573 see Nanda, A. K.

Khare, M.
5 see Poindexter, D. J.

Kim, H.-C.
605 see Black, C. T.

Kim, R.
529 see Flachs, B.

Kimbrel, T.
391 see Barahona, F.

Knight, J. W.
229 see Webb, A. M.

Knox, M. D.
5 see Poindexter, D. J.

Koeble, F.
173 see Helmich, U.

Kohler, A.
131 see Oakes, K. J.

Kohler, A.
207 see Theurich, K.

Korevaar, P., U. Schimpel, and R. Boedi
447 *Inventory budget optimization: Meeting system-wide service levels in practice*

Kubala, J. P.
77 see Wyman, L. W.

Kuch, G. P.
103 see Srikrishnan, J.

Kumar, T.
375 see Parija, G.

Labarta, J.
593 see Perez, J. M.

Labbi, A., and C. Berrospi
421 *Optimizing marketing planning and budgeting using Markov decision processes: An airline case study*

Ladanyi, L.
391 see Barahona, F.

Laguna, M.
477 see Better, M.

Lange, E.
207 see Theurich, K.

Le, H. Q., W. J. Starke, J. S. Fields, F. P. O'Connell, D. Q. Nguyen, B. J. Ronchetti, W. M. Sauer, E. M. Schwarz, and M. T. Vaden
639 *IBM POWER6 microarchitecture*

Le, T.
529 see Flachs, B.

Lee, J.
489 *Mixed-integer nonlinear programming: Some modeling and solution issues*

Lee, Y. M.
391 see Barahona, F.

Leenstra, J.
663 see Eisen, L.

Leenstra, J.
529 see Flachs, B.

Lehmann, H.
173 see Helmich, U.

Leopold, J.
103 see Srikrishnan, J.

Leung, T. O.
65 see Rizzolo, R. F.

Lewis, D. W.
685 see Berridge, R.

Liberty, J. S.
529 see Flachs, B.

Liberty, J. S.
521 see Shimizu, K.

Liu, P.
529 see Flachs, B.

Liu, Y., H. Jones, S. Vaidya, M. Perrone, B. Tydlitát, and A. K. Nanda
583 *Speech recognition systems on the Cell Broadband Engine processor*

Loeffler, P.
19 see Mayer, G.

Lund, D. J.
65 see Rizzolo, R. F.

Mack, M. J., W. M. Sauer, S. B. Swaney, and B. G. Mealey
763 *IBM POWER6 microprocessor reliability*

Maddison, R. J.
77 see Wyman, L. W.

Mäding, N.
663 see Eisen, L.

Magee, J. A.
53 see Berger, D. M.

Mansell, R.
229 see Webb, A. M.

Marchini, T. R.
757 see Armstrong, W. J.

Marik, M. D.
87 see Arnold, T. W.

Mayer, C.
157 see Conklin, C. R.

Mayer, C.
173 see Helmich, U.

Mayer, G., G. Doettling, R. F. Rizzolo, C. J. Berry, S. M. Carey, C. M. Carney, J. Keinert, P. Loeffler, W. Nop, D. E. Skooglund, V. A. Victoria, A. P. Wagstaff, and P. M. Williams
19 *Design methods for attaining IBM System z9 processor cycle-time goals*

McCreary, H.-Y., M. A. Broyles, M. S. Floyd, A. J. Geissler, S. P. Hartman, F. L. Rawson, T. J. Rosedahl, J. C. Rubio, and M. S. Ware
775 *EnergyScale for IBM POWER6 microprocessor-based systems*

McSweeney, T. P.
119 see Zee, M.

Mealey, B. G.
763 see Mack, M. J.

Mechtly, B. L.
65 see Rizzolo, R. F.

Michael, B.
529 see Flachs, B.

Morel, R. D.
685 see Berridge, R.

Moulic, J. R.
573 see Nanda, A. K.

Muehlbach, A., B. D. Valentine, D. Immel, M. S. Bomar, and T. V. Bolan
185 *Concurrent driver upgrade: Method to eliminate scheduled system outages for new function releases*

Mueller, M.
195 see Axnix, C.

Mueller, M. J., U. Weiss, T. Webel, L. C. Alves, W. J. Clarke, M. Strasser, E. Engler, G. Cautillo, H. Osterndorf, and J. Schulze
145 *Fully redundant clock generation and distribution with dynamic oscillator switchover*

Mueller, S. M.
663 see Eisen, L.

Mueller, S. M.
529 see Flachs, B.

Müller, S., and C. Supatgiat
295 *A quantitative optimization model for dynamic risk-based compliance management*

Murakami, H.
529 see Flachs, B.

Nam, H.-J.
5 see Poindexter, D. J.

Nanda, A. K., J. R. Moulic, R. E. Hanson, G. Goldrian, M. N. Day, B. D. D'Amora, and S. Kesavarapu
573 *Cell B.E. blades: Building blocks for scalable, real-time, interactive, and digital media servers*

Nanda, A. K.
583 see Liu, Y.

Narasimha, S.
5 see Poindexter, D. J.

Naveh, Y., Y. Richter, Y. Altshuler, D. L. Gresh, and D. P. Connors
263 *Workforce optimization: Identification and assignment of professional workers using constraint programming*

Nayar, N.
757 see Armstrong, W. J.

Nguyen, D. Q.
639 see Le, H. Q.

Nikfarjam, J. S.
173 see Helmich, U.

Nop, W.
19 see Mayer, G.

Noro, H.
529 see Flachs, B.

Nuñez Mencias, A.
195 see Axnix, C.

O'Connell, F. P.
639 see Le, H. Q.

Oakes, K. J., U. Helmich, A. Kohler, A. W. Piechowski, M. Taubert, J. S. Trotter, J. von Buttlar, and R. M. Whalen, Jr.
131 *Enhanced I/O subsystem recovery and availability on the IBM System z9*

Oh, H.-J.
529 see Flachs, B.

Onishi, S.
529 see Flachs, B.

Osterndorf, H.
145 see Mueller, M. J.

Paredes, J.
715 see Curran, B.

Parija, G., T. Kumar, H. Xi, and D. Keller
375 *Strategic planning of preparedness budgets for wildland fire management*

Pellicciotti, N. A.
87 see Arnold, T. W.

Penner, H.
195 see Axnix, C.

Perez, J. M., P. Bellens, R. M. Badia, and J. Labarta
593 *CellSs: Making it easier to program the Cell Broadband Engine processor*

Perrone, M.
583 see Liu, Y.

Peyravian, M.
529 see Flachs, B.

Piechowski, A. W.
131 see Oakes, K. J.

Pierce, B. R.
77 see Wyman, L. W.

Pille, J.
529 see Flachs, B.

Plass, D. W., and Y. H. Chan
747 *IBM POWER6 SRAM arrays*

Poindexter, D. J., S. R. Stiffler, P. T. Wu, P. D. Agnello, T. Ivers, S. Narasimha, T. B. Faure, J. H. Rankin, D. A. Grosch, M. D. Knox, D. C. Edelstein, M. Khare, G. B. Bronner, H.-J. Nam, and S. A. Butt
5 *Optimization of silicon technology for the IBM System z9*

Preiss, J.
663 see Eisen, L.

Raghavan, R.
559 see Chen, T.

Rajamani, K.
733 see Floyd, M. S.

Ramsey, M.
465 see Anderson, G. F.

Rankin, J. H.
5 see Poindexter, D. J.

Rawson, F. L.
733 see Floyd, M. S.

Rawson, F. L.
775 see McCreary, H.-Y.

Ray, B. K.
281 see Hu, J.

Reddy, C.
345 see Dash, S.

Restle, P. J.
685 see Berridge, R.

Richter, Y.
263 see Naveh, Y.

Riley, M. W., J. D. Warnock, and D. F. Wendel
545 *Cell Broadband Engine processor: Design and implementation*

Ripley, J. R.
685 see Berridge, R.

Rizzolo, R. F., T. G. Foote, J. M. Crafts, D. A. Grosch, T. O. Leung, D. J. Lund, B. L. Mechtly, B. J. Robbins, T. J. Siegel, M. J. Tremblay, and G. A. Wiedemeier
65 *IBM System z9 eFUSE applications and methodology*

Rizzolo, R. F.
19 see Mayer, G.

Robbins, B. J.
65 see Rizzolo, R. F.

Rogers, R. R.
77 see Wyman, L. W.

Ronchetti, B. J.
639 see Le, H. Q.

Rosedahl, T. J.
775 see McCreary, H.-Y.

Subject index for papers in Volume 51

Each index entry below is accompanied by an author's name and a page number; the author index contains the title of the paper and the names of coauthors, if any.

Subject	Author	Page
Analytical models		
Inventory budget optimization: Meeting system-wide service levels in practice	Korevaar	447
Arithmetic and logical unit design		
Decimal floating-point in z9: An implementation and testing perspective	Duale	217
IBM POWER6 accelerators: VMX and DFU	Eisen	663
Arrays		
IBM POWER6 accelerators: VMX and DFU	Eisen	663
IBM POWER6 SRAM arrays	Plass	747
Artificial intelligence		
Production design for plate products in the steel industry	Dash	345
Built-in self-test (BIST)		
Power-constrained high-frequency circuits for the IBM POWER6 microprocessor	Curran	715
Cell Broadband Engine		
Cell/B.E. blades: Building blocks for scalable, real-time, interactive, and digital media servers	Nanda	573
Cell Broadband Engine Architecture and its first implementation—A performance view	Chen	559
Cell Broadband Engine processor: Design and implementation	Riley	545
Cell Broadband Engine processor vault security architecture	Shimizu	521
CellSs: Making it easier to program the Cell Broadband Engine processor	Perez	593
Introduction to the Cell Broadband Engine Architecture	Johns	503
Microarchitecture and implementation of the synergistic processor in 65-nm and 90-nm SOI	Flachs	529
Speech recognition systems on the Cell Broadband Engine processor	Liu	583
Channel subsystem architecture		
Redundant I/O interconnect	Helmich	173
Sharing FCP adapters through virtualization	Srikrishnan	103
Circuit and device technology		
Cell Broadband Engine processor: Design and implementation	Riley	545
IBM System z9 eFUSE applications and methodology	Rizzolo	65
Clocking		
Cell Broadband Engine processor: Design and implementation	Riley	545
Fully redundant clock generation and distribution with dynamic oscillator switchover	Mueller	145
IBM POWER6 microprocessor physical design and design methodology	Berridge	685
Power-constrained high-frequency circuits for the IBM POWER6 microprocessor	Curran	715
CMOS		
Power-constrained high-frequency circuits for the IBM POWER6 microprocessor	Curran	715
Communications and communication networks		
High-speed source-synchronous interface for the IBM System z9 processor	Berger	53
IBM System z9 Open Systems Adapter for Communication Controller for Linux	Zee	119
Sharing FCP adapters through virtualization	Srikrishnan	103
Compilers and interpreters		
Open-standard development environment for IBM System z9 host firmware	Axnix	195
Computation		
Cell/B.E. blades: Building blocks for scalable, real-time, interactive, and digital media servers	Nanda	573
Cell Broadband Engine Architecture and its first implementation—A performance view	Chen	559
Computational methods		
Decimal floating-point in z9: An implementation and testing perspective	Duale	217
Computer applications		
Cell/B.E. blades: Building blocks for scalable, real-time, interactive, and digital media servers	Nanda	573
Cell Broadband Engine Architecture and its first implementation—A performance view	Chen	559
Computer architecture		
Advanced firmware verification using a code simulator for the IBM System z9	Theurich	207
Cell/B.E. blades: Building blocks for scalable, real-time, interactive, and digital media servers	Nanda	573

Cell Broadband Engine processor: Design and implementation — Riley 545
Cell Broadband Engine processor vault security architecture — Shimizu 521
Cryptographic system enhancements for the IBM System z9 — Arnold 87
Design methods for attaining IBM System z9 processor cycle-time goals — Mayer 19
High-speed interconnect and packaging design of the IBM System z9 processor cage — Harrer 37
High-speed source-synchronous interface for the IBM System z9 processor — Berger 53
IBM POWER6 accelerators: VMX and DFU — Eisen 663
IBM POWER6 microarchitecture — Le 639
IBM POWER6 partition mobility: Moving virtual servers seamlessly between physical systems — Armstrong 757
IBM System z9 Open Systems Adapter for Communication Controller for Linux — Zee 119
Optimization of silicon technology for the IBM System z9 — Poindexter 5
Reducing planned outages for book hardware maintenance with concurrent book replacement — Conklin 157
zAAPs and zIIPs: Increasing the strategic value of System z — Wyman 77

Computer organization and design
Advanced firmware verification using a code simulator for the IBM System z9 — Theurich 207
Cryptographic system enhancements for the IBM System z9 — Arnold 87
Design methods for attaining IBM System z9 processor cycle-time goals — Mayer 19
High-speed interconnect and packaging design of the IBM System z9 processor cage — Harrer 37
High-speed source-synchronous interface for the IBM System z9 processor — Berger 53
IBM System z9 Open Systems Adapter for Communication Controller for Linux — Zee 119
Introduction to the Cell Broadband Engine Architecture — Johns 503
Reducing planned outages for book hardware maintenance with concurrent book replacement — Conklin 157

Computer security
Cell Broadband Engine processor vault security architecture — Shimizu 521
Cryptographic system enhancements for the IBM System z9 — Arnold 87
Insider attack and real-time data mining of user behavior — Anderson 465

Computer system availability
Concurrent driver upgrade: Method to eliminate scheduled system outages for new function releases — Muehlbach 185
Enhanced I/O subsystem recovery and availability on the IBM System z9 — Oakes 131
Fully redundant clock generation and distribution with dynamic oscillator switchover — Mueller 145
Reducing planned outages for book hardware maintenance with concurrent book replacement — Conklin 157

Computers
Advanced firmware verification using a code simulator for the IBM System z9 — Theurich 207
Cryptographic system enhancements for the IBM System z9 — Arnold 87
Design methods for attaining IBM System z9 processor cycle-time goals — Mayer 19
High-speed source-synchronous interface for the IBM System z9 processor — Berger 53
Introduction to the Cell Broadband Engine Architecture — Johns 503
Optimization of silicon technology for the IBM System z9 — Poindexter 5
Reducing planned outages for book hardware maintenance with concurrent book replacement — Conklin 157

Cooling
Firmware and software support for IBM POWER6 microprocessor-based power and thermal management — McCreary 775
High-speed interconnect and packaging design of the IBM System z9 processor cage — Harrer 37

Cryptography
Cryptographic system enhancements for the IBM System z9 — Arnold 87

Design verification
Advanced firmware verification using a code simulator for the IBM System z9 — Theurich 207

Device drivers
Practical software reuse for IBM System z I/O subsystems — Webb 229

Error control and recovery
Enhanced I/O subsystem recovery and availability on the IBM System z9 — Oakes 131
IBM POWER6 microprocessor reliability — Mack 763

I/O devices, systems, and technology
Practical software reuse for IBM System z I/O subsystems — Webb 229

IBM POWER6
Firmware and software support for IBM POWER6 microprocessor-based power and thermal management — McCreary 775
IBM POWER6 accelerators: VMX and DFU — Eisen 663
IBM POWER6 microarchitecture — Le 639
IBM POWER6 microprocessor physical design and design methodology — Berridge 685
IBM POWER6 microprocessor reliability — Mack 763
IBM POWER6 partition mobility: Moving virtual servers seamlessly between physical systems — Armstrong 757
IBM POWER6 SRAM arrays — Plass 747
Power-constrained high-frequency circuits for the IBM POWER6 microprocessor — Curran 715
System power management support in the IBM POWER6 microprocessor — Floyd 733

IBM System z9
Advanced firmware verification using a code simulator for the IBM System z9 — Theurich 207
Concurrent driver upgrade: Method to eliminate scheduled system outages for new function releases — Muehlbach 185

Cryptographic system enhancements for the IBM System z9 — Arnold — 87
Decimal floating-point in z9: An implementation and testing perspective — Duale — 217
Design methods for attaining IBM System z9 processor cycle-time goals — Mayer — 19
Enhanced I/O subsystem recovery and availability on the IBM System z9 — Oakes — 131
Fully redundant clock generation and distribution with dynamic oscillator switchover — Mueller — 145
High-speed interconnect and packaging design of the IBM System z9 processor cage — Harrer — 37
High-speed source-synchronous interface for the IBM System z9 processor — Berger — 53
IBM System z9 eFUSE applications and methodology — Rizzolo — 65
IBM System z9 Open Systems Adapter for Communication Controller for Linux — Zee — 119
Open-standard development environment for IBM System z9 host Firmware — Axnix — 195
Optimization of silicon technology for the IBM System z9 — Poindexter — 5
Practical software reuse for IBM System z I/O subsystems — Webb — 229
Reducing planned outages for book hardware maintenance with concurrent book replacement — Conklin — 157
Redundant I/O interconnect — Helmich — 173
Sharing FCP adapters through virtualization — Srikrishnan — 103
zAAPs and zIIPs: Increasing the strategic value of System z — Wyman — 77

Integrated circuit design
IBM POWER6 accelerators: VMX and DFU — Eisen — 663
IBM POWER6 microprocessor physical design and design methodology — Berridge — 685
Power-constrained high-frequency circuits for the IBM POWER6 microprocessor — Curran — 715

Interconnection technology
High-speed interconnect and packaging design of the IBM System z9 processor cage — Harrer — 37
High-speed source-synchronous interface for the IBM System z9 processor — Berger — 53
Optimization of silicon technology for the IBM System z9 — Poindexter — 5

Interfaces
Practical software reuse of IBM System z I/O subsystems — Webb — 229

Lithography
Polymer self assembly in semiconductor microelectronics — Black — 605

Logic design and technology
IBM POWER6 microprocessor physical design and design methodology — Berridge — 685

Machine computation and data analysis
Advances in analytics: Integrating dynamic data mining with simulation optimization — Better — 477

Materials
The material allocation problem in the steel industry — Yanagisawa — 363

Mathematics (applied)
A quantitative optimization model for dynamic risk-based compliance management — Müller — 295
Advances in analytics: Integrating dynamic data mining with simulation optimization — Better — 477
An SQL-based cost-effective inventory optimization solution — Katircioglu — 433
Applying supply chain optimization techniques to workforce planning problems — Gresh — 251
Insider attack and real-time data mining of user behavior — Anderson — 465
Inventory allocation and transportation scheduling for logistics of network-centric military operations — Barahona — 391
Inventory budget optimization: Meeting system-wide service levels in practice — Korevaar — 447
Marketing event optimization — Selby — 409
Mixed-integer nonlinear programming: Some modeling and solution issues — Lee — 489
Modeling of risk losses using size-biased data — Yashchin — 309
Multicommodity network flow approach to the railroad crew-scheduling problem — Vaidyanathan — 325
Optimizing marketing planning and budgeting using Markov decision processes: An airline case study — Labbi — 421
Production design for plate products in the steel industry — Dash — 345
Statistical methods for automated generation of service engagement staffing plans — Hu — 281
Strategic planning of preparedness budgets for wildland fire management — Parija — 375
The material allocation problem in the steel industry — Yanagisawa — 363
Workforce optimization: Identification and assignment of professional workers using constraint programming — Naveh — 263

Memory (computer) design and technology
IBM POWER6 microprocessor reliability — Mack — 763

Memory, random-access
IBM POWER6 SRAM arrays — Plass — 747

Microprocessor systems and applications
Cell B.E. blades: Building blocks for scalable, real-time, interactive, and digital media servers — Nanda — 573
Cell Broadband Engine Architecture and its first implementation—A performance view — Chen — 559
Cell Broadband Engine processor vault security architecture — Shimizu — 521
Firmware and software support for IBM POWER6 microprocessor-based power and thermal management — McCreary — 775
IBM POWER6 microarchitecture — Le — 639
IBM POWER6 microprocessor reliability — Mack — 763
IBM POWER6 SRAM arrays — Plass — 747
Introduction to the Cell Broadband Engine Architecture — Johns — 503

Microarchitecture and implementation of the synergistic processor in 65-nm and 90-nm SOI — Flachs 529
Speech recognition systems on the Cell Broadband Engine processor — Liu 583
zAAPs and zIIPs: Increasing the strategic value of System z — Wyman 77

Multichip modules (MCMs)
Optimization of silicon technology for the IBM System z9 — Poindexter 5

Multimedia
IBM POWER6 accelerators: VMX and DFU — Eisen 663

Nanoscale structures and devices
Polymer self assembly in semiconductor microelectronics — Black 605

Natural language processing
Speech recognition systems on the Cell Broadband Engine processor — Liu 583

Operating systems
IBM System z9 Open Systems Adapter for Communication Controller for Linux — Zee 119
Practical software reuse for IBM System z I/O subsystems — Webb 229

Optical lithography
Polymer self assembly in semiconductor microelectronics — Black 605

Optimization
A quantitative optimization model for dynamic risk-based compliance management — Müller 295
Advances in analytics: Integrating dynamic data mining with simulation optimization — Better 477
An SQL-based cost-effective inventory optimization solution — Katircioglu 433
Applying supply chain optimization techniques to workforce planning problems — Gresh 251
Insider attack and real-time data mining of user behavior — Anderson 465
Inventory allocation and transportation scheduling for logistics of network-centric military operations — Barahona 391
Inventory budget optimization: Meeting system-wide service levels in practice — Korevaar 447
Marketing event optimization — Selby 409
Mixed-integer nonlinear programming: Some modeling and solution issues — Lee 489
Modeling of risk losses using size-biased data — Yashchin 309
Multicommodity network flow approach to the railroad crew-scheduling problem — Vaidyanathan 325
Optimizing marketing planning and budgeting using Markov decision processes: An airline case study — Labbi 421
Production design for plate products in the steel industry — Dash 345
Statistical methods for automated generation of service engagement staffing plans — Hu 281
Strategic planning of preparedness budgets for wildland fire management — Parija 375
The material allocation problem in the steel industry — Yanagisawa 363
Workforce optimization: Identification and assignment of professional workers using constraint programming — Naveh 263

Packaging
High-speed interconnect and packaging design of the IBM System z9 processor cage — Harrer 37
Redundant I/O interconnect — Helmich 173

Performance analysis
Cell Broadband Engine Architecture and its first implementation—A performance view — Chen 559
Design methods for attaining IBM System z9 processor cycle-time goals — Mayer 19
IBM POWER6 accelerators: VMX and DFU — Eisen 663
System power management support in the IBM POWER6 microprocessor — Floyd 733

Polymers
Polymer self assembly in semiconductor microelectronics — Black 605

Power management
Design methods for attaining IBM System z9 processor cycle-time goals — Mayer 19
Firmware and software support for IBM POWER6 microprocessor-based power and thermal management — McCreary 775
Power-constrained high-frequency circuits for the IBM POWER6 microprocessor — Curran 715
System power management support in the IBM POWER6 microprocessor — Floyd 733

Production scheduling
Multicommodity network flow approach to the railroad crew-scheduling problem — Vaidyanathan 325
The material allocation problem in the steel industry — Yanagisawa 363
Workforce optimization: Identification and assignment of professional workers using constraint programming — Naveh 263

Programming, mathematical
A quantitative optimization model for dynamic risk-based compliance management — Müller 295
Advances in analytics: Integrating dynamic data mining with simulation optimization — Better 477
An SQL-based cost-effective inventory optimization solution — Katircioglu 433
Applying supply chain optimization techniques to workforce planning problems — Gresh 251
Insider attack and real-time data mining of user behavior — Anderson 465
Inventory allocation and transportation scheduling for logistics of network-centric military operations — Barahona 391
Inventory budget optimization: Meeting system-wide service levels in practice — Korevaar 447
Marketing event optimization — Selby 409
Mixed-integer nonlinear programming: Some modeling and solution issues — Lee 489
Modeling of risk losses using size-biased data — Yashchin 309

Multicommodity network flow approach to the railroad crew-scheduling problem — Vaidyanathan — 325
Optimizing marketing planning and budgeting using Markov decision processes: An airline case study — Labbi — 421
Production design for plate products in the steel industry — Dash — 345
Statistical methods for automated generation of service engagement staffing plans — Hu — 281
Strategic planning of preparedness budgets for wildland fire management — Parija — 375
The material allocation problem in the steel industry — Yanagisawa — 363
Workforce optimization: Identification and assignment of professional workers using constraint programming — Naveh — 263

Programming, programs, and programming languages
CellSs: Making it easier to program the Cell Broadband Engine processor — Perez — 593
Open-standard development environment for IBM System z9 host firmware — Axnix — 195
Production design for plate products in the steel industry — Dash — 345
Workforce optimization: Identification and assignment of professional workers using constraint programming — Naveh — 263

Reliability
Concurrent driver upgrade: Method to eliminate scheduled system outages for new function releases — Muehlbach — 185
Enhanced I/O subsystem recovery and availability on the IBM System z9 — Oakes — 131
IBM POWER6 microprocessor reliability — Mack — 763
IBM System z9 eFUSE applications and methodology — Rizzolo — 65
Optimization of silicon technology for the IBM System z9 — Poindexter — 5
Reducing planned outages for book hardware maintenance with concurrent book replacement — Conklin — 157
Redundant I/O interconnect — Helmich — 173

Self-assembled monolayer (SAM)
Polymer self assembly in semiconductor microelectronics — Black — 605

Silicon-on-insulator (SOI)
Microarchitecture and implementation of the synergistic processor in 65-nm and 90-nm SOI — Flachs — 529
Power-constrained high-frequency circuits for the IBM POWER6 microprocessor — Curran — 715

Simulation
Advances in analytics: Integrating dynamic data mining with simulation optimization — Better — 477

Software reliability
Concurrent driver upgrade: Method to eliminate scheduled system outages for new function releases — Muehlbach — 185

Speech processing
Speech recognition systems on the Cell Broadband Engine processor — Liu — 583

Supercomputing
CellSs: Making it easier to program the Cell Broadband Engine processor — Perez — 593
Microarchitecture and implementation of the synergistic processor in 65-nm and 90-nm SOI — Flachs — 529

System-on-a-chip (SoC)
Cell Broadband Engine processor: Design and implementation — Riley — 545

Testing
Advanced firmware verification using a code simulator for the IBM System z9 — Theurich — 207
Decimal floating-point in z9: An implementation and testing perspective — Duale — 217
Design methods for attaining IBM System z9 processor cycle-time goals — Mayer — 19
IBM System z9 eFUSE applications and methodology — Rizzolo — 65

Testing, chip
Cell Broadband Engine processor: Design and implementation — Riley — 545

Vector processing
IBM POWER6 accelerators: VMX and DFU — Eisen — 663

Verification
Advanced firmware verification using a code simulator for the IBM System z9 — Theurich — 207

Virtual machines
IBM POWER6 partition mobility: Moving virtual servers seamlessly between physical systems — Armstrong — 757

Visualization
IBM POWER6 partition mobility: Moving virtual servers seamlessly between physical systems — Armstrong — 757
